### Hong Kong: Past and Present

This article is about changes in Hong Kong. This article talks about Hong Kong in the past and at present. There are many differences in transport, jobs, housing and entertainment.

In the past, people travelled by either rickshaw or bicycle. Nowadays, people travel by either bus or train. To compare, it is more convenient to travel nowadays.

Jobs in the past were simple. People were either farmers or fishermen. For now, people work as businessmen, businesswomen or Youtubers. People are rich, but they are much busier.

Housing in the past were inconvenient. People lived in either fishing villages or farming villages. Nowadays, people live in either flats, tall buildings or apartments. It is very convenient now.

Entertainment in the past was simple and dull. People played either hide-and-seek or marbles. Nowadays, people either watch

televisions or use smartphones. We have so much fun now.

Life is more convenient, fun and comfortable than before. I want to go to the past and see how it feels. I also want to go to the future to experience too.
