Pollution in Hong Kong: A Letter to the Government

Dear Sir or Madam,

I am writing to complain about air pollution in Hong Kong. The government ought to stop the pollution from getting worse.

There are three major causes of air pollution. Firstly, factories produce so much smoke. Secondly, the heavy traffic in Hong Kong causes air pollution. Thirdly, there are harming chemicals coming out from the air conditioners.

Air pollution in Hong Kong is so serious. We breathe in dirty air. It causes us to get sick and affects our health. Moreover, the pollution causes climate change. The temperature becomes higher than before. Some animals lost their habitats. For example, polar bears lose their home as the ice is melting.

Therefore, we should use public transport instead of driving our own cars. Also, we can use solar panels. These ways cause less air pollution. Besides, the government ought to take control of the heavy traffic.

I think we can improve the situation. Our generation can have a better living environment.

Yours faithfully,

Nicole
